

PILOT WATER MARKET V 1.0 WORKSHOPS

Please join us at the College of the Sequoias computer lab for workshops to learn how you can buy or sell unused groundwater allocations through the Mid-Kaweah Groundwater Sustainability Agency (MKGSA).

These “office hours” style workshops will give participants the opportunity to drop in as their schedules allow and learn about:

- the MKGSA pilot water market history and function;
- who is eligible to participate; and
- rules, regulations, and benefits of the market.

MKGSA and consultant staff will be present to give live demonstrations as well as help all interested and eligible parties enroll and participate their first auction, as a buyer or seller of groundwater credits.
